## FOR YOUR BEST EVER SKIN

Dr Geoffrey Heber and Ultraceuticals in-house researchers and formulators have developed the Ultra MD skincare range as a concise science-based regimen of products to help address the major skin concerns of premature ageing, congestion, visible pores, acne-prone skin and surface discolouration.

The Ultra MD products have been developed with high concentrations of potent ingredients in sophisticated consumer trialled formulations and are available solely through cosmetic medical practices.

## SKINCARE THAT WORKS

We believe healthy looking, radiant skin can be achieved by everyone.

Ultra MD products have been developed to ensure optimal skin results for our customers, whilst balancing this with packaging that is environmentally considerate where possible.

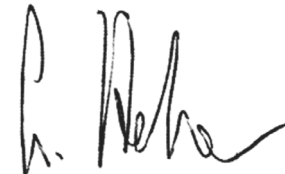

## MEET OUR FOUNDER

Dr. Geoffrey Heber is one of Australia's leading cosmetic physicians.

In 1988, he established Australia's first specialised non-surgical cosmetic medical practice, Heber Davis Skin Clinic, in Sydney. At that time, dedicated cosmetic clinics were an uncommon concept, both in Australia and Internationally.

Dr. Heber recognised the need for more powerful and effective professionally recommended skincare based on effective levels of proven active ingredients with claims that could be trusted.
